Merchants Bear Brunt Because Can Not Hide Stocks.

The valuation statements filed by the assessors this year are the cause of all the trouble between the merchants and Chancy and Morton the assessors. The merchants complain that the valuation of their stocks have been unjustly increased.

A study of these lists presents an in-teresting array of figures. While it is undonbiedly true that in many cases valuations are disproportionately high It is also painfully evident that many are not high enough, Some of Topolor's richest men appear on the tax rolls as having very little personal property-including money, bonds and notes-while others who are not rated among the wealthy appear on the rolls as among Topeku's wealthiest individ-

he facts are that Topeka is troubled with a class of wealthy tax dedgers. High men find a way of concenling their property from the assessors. When the official arrives the rich man has suddenly become poor, and with a long face he fills out the blank which is harded to him.

Others reputed well off are invisible,

Others reputed well off are invisible, and if not actually poverty stricken, have less than \$1,000 to be maxed. Of course it may be said in justice to some that their wealth may be in real estate or in stocks in banks and other corporations, taxed as such. The fact remains that a great deal of personal property escapes just taxation and great injustice is worked upon those who return their property or whose property cannot escape the assessor's 1900.

practically the same as that of a year ago-in fact, several of the banks have acteable them decreased. The First Markonal has been decreased \$1000 the Markonal has been decreased \$1000 the Markonal hands no change, the Central National, increased five thousand; the Rank of Topoles increased five thousand; the Rank of Chizens, increased four thousand; the State Savings, decreased fifteen hundred. N. Y. Morehouse, Increased for the State Savings, decreased fifteen hundred.

State Savings, decreased fifteen hundered.

In view of the heavy increases the commissioners should decrease the percentage of taxation correspondingly. Unless thoy do this they will demonstrate one of a few things; their increating to manage the county's affairs; the extravagarce of the county, or show a diagraceful management which piaces the burdens of government uncountly upon those who try to honestly list their property. The list of personal property assessed for \$1,000 or over follows. It will be tailed that only twenty-eight corporations and individuals in this wealthy commutify pay personal property taxes.

A practical and therough test was made of the acoustic properties of the convention hall. Members of the national committee and the local organizations that have taken in the preparation of the building for convention purposes assembled and listened to test speeches made by Mayor Ashbridge, Sergeant-at-Arms Wiswell, Chairman Dobbins, of the building committee and others. The band was in the place it will occupy during the convention and others. The band was in the place it will occupy during the convention and others and music. Washington, June 14.—A dispatch from Admiral Remey, received at the navy department, makes plain the reason why the gunboat Nashville was sent to Taku instead of the Helena, as requested by the navy department, in answer to Admiral Remey reports that the Helena is now at the capital of the island of Panny, serving as a station ship. She is in need of two months' repairs and was consequently unavailable for the required service. The Helena has been subjected to very heavy service ever since her departure from the United States just before the outbreak of the Spanish war, and it is believed that her bollers are in need of renovation.

Admiral Rempff's dispatch this morning makes no mention of any undue delay in the movement of the forcign forces upon Pekin, and as he is in a position to secure the latest and most accurate news from the relief column the officials here believe that there have been no untoward happenings. Some surprise is experienced at the strength of the column. There is a sincere regret entertained at the mavy department at the comparatively small representation of the United States in this movement, But it is said that the navy has done all it can to meet the calls upon it.

navy has done all it can to meet the calls upon it.

The intimation is very clear that if further reinforcements are expected for the Chinese service recourse must he had to the United States army. On their part, however, the army officers repudiate any purpose to become involved in the situation, and it is officially stated that there is still no intention of sending any United States troops to China.

Admiral Remey also has notified the navy department of the departure from Manila, in accordance with the department's orders, of the Solace. She carries marines to Taku to reinforce Admiral Kempff. She will proceed homeward, stopping at Guam.

RAISING THE TRUSSES.

Most Difficult Work on the Auditorium Commences.

The contractors began work this norning at raising the six large steel trusses which will support the roof of the audtorium of the new city building This is by far the most interesting part of the work from a spectator's standpoint and is really the most difficult piece of engineering on the building.

The trusses are six in number and each truss is made in four sections. They weigh about 8,000 pounds to the section and are too heavy to be hotsted by the light electric engine which has

been used for holsting other material.

The holsting capacity of the electric engine being about 3,000 pounds.

The heavy sections are being raised by means of winches which are attached to the large boom. The false work which has been erected in the auditorium serves as a base for the booms tracks which are built on the false work and on Shanghai, June 14.—A dispatch from Caury King says that a riot has taken place at Yun Na Fu.
